

Meta model to put the cart before the horse iterative top-down approach

challenges?

- other software on measured system

- /B/
- only for Java programs
 - no performance analysis

Target Group

- /G/ • Component Architects /-Deployers (→ Reussner)

- Developers of component based software

Application Attribute

|A| · reengineering of existing software

- Prototyping

- Development of Software (compare implementations) } explain

- Verifying of design and implementation

Operation Conditions

- Desktop system (with Eclipse) / JRE

- Server ? (optional)

Environment

|E| · PC M

- CTA

- Java

- Eclipse
